

Product Name :
Wood Working Mortiser Tenoning Machine**Product Code :**
CHINAELABC2530025**Description :**

Wood Working Mortiser Tenoning Machine

Technical Specification :

A mortiser or morticer is a specialized woodworking machine used to cut square or rectangular holes in a piece of lumber (timber), such as a mortise in a mortise and tenon joint.

Each tenon can be inserted into a cavity (mortise) on another piece of wood to form a mortise and tenon joint.

Tenoning machines use cutter heads and/or saw blades to form projections (tenons) on pieces of stock.

The figure to the right shows a single-end tenoning machine.

2 no electric motor of 2 hp / 2800 rpm (3 phase)

1 hp / 2800 rpm (3-phase)
