

Product Name :
Flexible Manufacturing System

Product Code :
CHINAELABC2540009

Description :

Flexible Manufacturing System

Technical Specification :

FEATURE:

Automatic Storage & retrieval system
Linear Shuttle Conveyor
Loading & Unloading Arm: 2 Axis for Lathe / 3 Axis for Mill
Pallet Conveyor

SPECIFICATION:

Flexible Manufacturing System (FMS) is a prototype of FMS, which are currently being used in the industry.

It consists of following equipment:

CNC Lathe with Servo Motors
CNC Mill with Servo Motors
Gantry for Loading and Unloading from CNC Lathe Machine
Three Axes Robotic Arm for Loading and Unloading in CNC Mill Machine
Pallet Conveyor / Automated Guided Vehicle
Automatic Storage and Retrieval System

Engineering Lab China
