## **Product Name:**

Electronic Concrete Test Hammer (Schmidt Hammer)

Product Code: CHINAELABC2650067

## **Description:**

Electronic Concrete Test Hammer (Schmidt Hammer)

## **Technical Specification:**

The quality of concrete is mainly judged by its compressive strength directly affecting the loadbearing capacity and durability of concrete structures.

Concrete test hammer (Schmidt Hammer N type) is used to measure the compressive strength characteristics of hardened concrete non-destructively, control uniform concrete quality and detect weak spots in the concrete. The test object should have a minimum thickness of 100 mm.
