Concrete Flow Table Test Set

Technical Specification :

Concrete flow table test set for judging the strength and stability of concrete specimens of diversity. Our machine has been developed as per the international standards EN 12350-5. It is used for high capacity concrete mix and to maintain a flow index by the means of arithmetic. The dimension of the apparatus is 700 X 850 X 300 mm and the weight is 40 kg. Between the two tables, the measurement of the upper table is 700 X 700 mm. The top diameter of the stainless steel cone is 130 +/- 2; the height and base diameter are both 200 +/- 2 and its thickness is 1.5 mm.

Specification :

The apparatus is made of a double steel table.
The flow index is shown in the arithmetic count.
The top table is corrosion protected.
The upper table is hinged on the lower one.
