

**Product Name :**  
Blaine Air Permeability Apparatus

**Product Code :**  
CHINAELABC2680037

**Description :**

Blaine Air Permeability Apparatus

**Technical Specification :**

Blaine Air Permeability Apparatus for judging the strength and stability of concrete specimens of diversity. Our machine has been developed as per the international standards IS 4031, 5516, 1727 and 4828, ASTM C-204, BS 4359-2.

The pore volume in the bed determines the rate of air flow.

The components that apparatus comprises of are perforated disk, stainless-steel test cell, calibrated U-tube manometer, plunger, rubber aspirator as well as bulb. All these components come mounted on robust wood panel equipped with base.

Blaine Air Permeability Apparatus is utilized for ascertaining the fineness of the Portland cement, limes as well as similar powders that are measured in terms of their surface.

By making use of this apparatus, the air quantity is drawn via the bed of specific porosity.

Blaine Air Permeability Apparatus following Accessories:

Filter Paper

U Manometer Tube

Rubber Aspirator

Manometer Liquid, 250 ml

Test Stand

Plastic Funnel
