

Product Name :
Flexible Wall Permeability Apparatus

Product Code :
CHINAELABC2690108

Description :

Soil Permeability - Flexible Wall Permeability Apparatus

Technical Specification :

Permeability System As per ASTM D5084 The apparatus consists of a control panel with three lines each for In-effluent line Effluent line and Cell pressure line. Push in valves are provided in each line to set and measure pressure either on digital display or on master gauge. It has provision for additional modules with three lines for each cell. One module is for one cell.

The apparatus consists of a control panel with three lines each for
