

Product Name :
Combined Electronic Axial Compressometer and Lateral
Extensometer for Nx size Sample

Product Code :
CHINAELABC2750043

Description :

Static Cum Dynamic Rock Triaxial Testing System - Combined Electronic Axial Compressometer and Lateral Extensometer for Nx size Sample

Technical Specification :

This unit is essentially used for finding out poisson ratio of rocks specimen. It has displacement sensors both for lateral extension and for compression.
Total displacement is $\pm 2\text{mm}$ with sensitivity of 0.001 mm . Complete with digital display.
