

Product Name :
Apparatus for Analysis of Freshly Mixed Concrete

Product Code :
CHINAELABC2680069

Description :

Soundness - Apparatus for Analysis of Freshly Mixed Concrete

Technical Specification :

Used for determining proportions of the constituents of freshly mixed concrete with 40 mm maximum sized aggregate.

The apparatus comprises the following :-

A semi-automatic balance of 5 kg capacity and having a sensitivity of 0.5 gms including set of weights.

Eight containers made of copper.

Two tanks of 300 mm internal dia x 300 mm deep and 150 mm dia x 225 mm deep respectively interconnected by a flexible hose.

Two nesting sieves 450 mm dia (IS Sieve 4.75 mm, 100 mm deep and IS Sieve 150 micron 300 mm deep.)
