

Product Name :
Wet Wheel Abrasion Tester**Product Code :**
CHINAELABC4780001**Description :**

Wet Wheel Abrasion Tester

Technical Specification :

Abrasion tester is intended for testing the compatibility and water detrimental resistance of slurry surfacing mixtures after molding. The abrasion tester can help to obtain the best estimate of bitumen content together with wheel tracker test.

Technical Parameters

Rotating speed of electric motor: 1400RPM

Auto-rotation rate of wheel head: 140RPM

Revolution rate of wheel head: 61RPM

Weight of wheel head: 2.27kg

Length of rubber hose for wheel head: 127mm

Timing: 5min

Power: AC 380V, 50Hz, 380W (3-phase 4-wire system, with zero line)
