Product Name : Wet Wheel Abrasion Tester

Product Code : CHINAELABC4780001

Description :

Wet Wheel Abrasion Tester

Technical Specification :

Abrasion tester is intended for testing the compatibility and water detrimental resistance of slurry surfacing mixtures after molding. The abrasion tester can help to obtain the best estimate of bitumen content together with wheel tracker test.

Technical Parameters Rotating speed of electric motor: 1400RPM Auto-rotation rate of wheel head: 140RPM Revolution rate of wheel head: 61RPM Weight of wheel head: 2.27kg Length of rubber hose for wheel head: 127mm Timing: 5min Power: AC 380V, 50Hz, 380W (3-phase 4-wire system, with zero line)
