

Product Name :
Multi-Functional Rebar Locator

Product Code :
CHINAELABC5250002

Description :

Multi-Functional Rebar Locator

Technical Specification :

Rebar locator is a multi-functional integrated rebar detector which can be used for testing the thickness of protective layer, measuring the diameter, location, and distribution of rebar as well as for detecting the corrosion content of rebar.

Measuring range of rebar diameter: Ø6mm~50mm

Rebar cover meter

range (mm): First range

3~98

Max. allowed error

for cover

meter: ±1mm 6~56

±2mm 58~69

±4mm 70~98

Max. allowed error for diameter measurement ±1 rebar standard level

Data transmission: USB

USB port: Thumb drive storage available

Engineering Lab China
