Product Name:

Dynamic Friction In Cylindrical Pin Roller

Product Code: CHINAELABC3600003

Description:

Dynamic Friction In Cylindrical Pin Roller

Technical Specification:

Together with the drive unit

Frictional forces in different friction pairs and loads

Frictional forces with different lubrication

Frictional forces at different relative speeds of the friction partners

Wear under different friction parameters

Frictional forces between two sliding friction pairs

Investigation of wear

Use of different lubricants possible
