Product Name:

Heat Conduction In Gases and Liquids

Product Code: CHINAELABC3730004

Description:

Heat Conduction In Gases and Liquids

Technical Specification:

Study of the heat conduction of gases and liquids

Experiments in annular gap formed by 2 concentric cylinders

Experimental media water, oil, air

Radiation portion of heat transfer negligible due to low temperatures and polished surfaces

Adjustable electric heater

Manual valves for flow rate adjustment (cooling water, medium to be investigated)

Measuring amplifier with digital displays for temperature difference and heater power and control elements
