

Product Name :
Computerized Electronic Wire Torsion Testing Machine

Product Code :
CHINAELABC3810004

Description :

Computerized Electronic Wire Torsion Testing Machine

Technical Specification :

Stainless table makes it easier to clean.
Equipped with translucent safety shield to prevent specimen from popping out when it breaks.
More reliable hydraulic gripping means for wires in large diameter.
TFT true-color LED screen to display current rotation, target rotation turn and configured speed.
No stepping in speed adjustment. Automatic data recording. Rotation speed and turns configurable.
Automatic stop when reaches target rotation turns or specimen breaks.
Distance between grip jaw continuously adjustable by moving the ball screw.
Stably and reliably controlled through human interface and PLC.

Specimen diameter (mm): 0.23
Grip Jaw distance (mm): 10300
Torsion Method: Single-way, two-way
Rotation range: 19999
Torsion speed range (turns/min): 60180
Power supply: 0.55kW/AC220V
