

Product Name :
High Volume Sampler

Product Code :
CHINAELABC2670002

Description :

High Volume Sampler

Technical Specification :

The high volume air sampler collects suspended particulates on large filter paper. The name high volume is appropriate because the sampling flow rate has a high level of 20 to 60 standard cubic feet per minute (SCFM). Because of the high flow rate, large quantities of particles ranging from 0.1 to 1 gram are collected over a typical 24-hour sampling period

Characteristics: Brushless Blower, Low running cost, Low noise operation, Controlled flow, Light weight and small in size, Drain plug for manometer.

TECHNICAL SPECIFICATIONS :

Blower: Continuous duty blower with brushless Motor

Flo Rate: 0.8 to 1.8 m³/min

Particle Size: Down to 1.6 micron depending upon Filter used

Recommended filter: GF/A (8" X 10") for common use, EPM 2000 for Special Research or equivalent

Time Record: 0 to 99999.99 hrs. Time totalizer records the running time in hours

Timer: 24 Hr Programmable timer, number of required intervals can be programmed

Power requirement: 220Volts, Single phase AC

Environmental Testing Lab Equipments, tools, products and systems for engineering lab and engineering teaching vocational education. At Engineeringlabchina get practical educational equipment for Environmental Testing Lab Equipments schools and teaching staff. Buy wholesale China Environmental Testing Lab Equipments Manufacturers. Engineeringlabchina high quality Technical Education Equipment products at the

best price from China. Environmental Testing Lab Equipments China, Experiment Equipment suppliers China, and factory in China

Engineering Lab China
