

Product Name :
Movable Emission Extractor

Product Code :
CHINAVLABM9810001

Description :

Movable Emission Extractor

Technical Specification :

It is movable. The standard working diameter is 8m, adding to 16m at most. Adopting advanced international technology and materials, the product can solve emission problems in auto repair shop and car testing plant, to provide pollution-free environment for site operations personnel and protect their physical and mental health to enhance efficiency. It features with reasonable price, aesthetic appearance, ease of use, durable life and so on.

Our company provides you satisfactory service from technical advice, tentative design, installation and post-sale service!

Technical Parameters:

Power	260W
Motor	220V
Frequency	50Hz
Air	1100m ³ /h
Pressure of Air	700 Pa
Extraction hose:	Hose R & D and manufacturing independently;

Heat-resistant temperature: -45°C~185°C

72 hours furnace experiment;

Lining for the heat-resistant fiber, with a layer heat-

Electrical Wire:
Extraction Fan:

resistant rubber; nylon outer skeleton, good corrosion resistance.

8 m automatic extension and contract electric wire;
Low noise, high speed, corrosion resistance and multi-wing

Aluminum alloy wings.
